

# Admissions Policy 2019-20

---

## Introductory Statement

The Bridge Satellites is a school for pupils with a diagnosis of autism. The Bridge Satellites provide specialist provision over a number of bases, which are close to mainstream schools, enabling inclusion opportunities. All pupils who attend The Bridge Satellites are able to access the National Curriculum.

## Admissions to the School

The Bridge Satellite is a co-educational special school, which provides 90 places for children and young people in the age range 4 to 19 with a diagnosis of autism.

For a child to be admitted, the school must be named by a local authority in the child's education, health and care plan ('EHCP').

Parents wishing their children to benefit from this provision should specify this to the Local Authority area in which they reside when their child's EHCP is being discussed.

For further information about The Bridge Satellites, and the process for obtaining a place please contact:
